

FULL TESTING RECORD TABLE

ID	Component	Test / Scenario	Expected Result	Actual Result	Pass/Fail	Issue Identified
T1	Attendance Rate KPI	Recalculate attendance rate from raw CSV	46.30%	46.30%	✓ PASS	None
T2	No-Show Rate KPI	Recalculate no-show rate from raw CSV	48.50%	48.50%	✓ PASS	None
T3	Attendance With Reminder	Filter to reminded; recalculate attendance	47.60%	47.60%	✓ PASS	None
T4	Attendance Without Reminder	Filter to non-reminded; recalculate attendance	42.7%	42.7%	✓ PASS	None
T5	Reminder Effectiveness Gap	Calculate T3 – T4	4.9 pp	4.9 pp	✓ PASS	None
T6	Channel Ranking	Recalculate attendance rate per channel	SMS 49.6% > Email 46.5% > WhatsApp 44.6% > None 42.7%	SMS > Email > WhatsApp > None	✓ PASS	None
T7	Highest-Risk Combination	Filter Very Far + 2–4 Weeks; recalc no-show	83.3%	83.3%	✓ PASS	Small sample (n=18) — directional not precise

T8	Distance Filter (Dashboard)	Apply distance filter; verify KPI cards update	Values change proportionally; no errors	Match notebook reference (Close 48.2%, Moderate 45.1%, Far 39.6%, Very Far 29.2%)	Match	None
T9	Age Group Filter (Dashboard)	Apply age filter; verify no-show values	Match manual recalculation per band	Match notebook reference (18–24: 45.6%, 65+: 48.8%, etc.)	Match	None
T10	Robustness — Channel by Distance	Re-rank channels within each distance band	SMS top in majority of bands	SMS remains top in majority of bands	⚠ PASS (majority holds) with caveat	SMS lead is narrow in Moderate Distance Email collapses in Far Distance
T11	Robustness — Risk Combo by Type	Test Very Far + 2–4 Weeks across appointment types	High no-show persists across types	Persists in all four types	PASS	None
T12	Cross-Track Model Re-validation	DS re-runs model without Unnamed: 0	Booking lead time + distance remain top 2	Held	PASS	Artefact column present
